

Experiment 10: Simple application using Ajax

Aim: To make a simple application using Ajax.

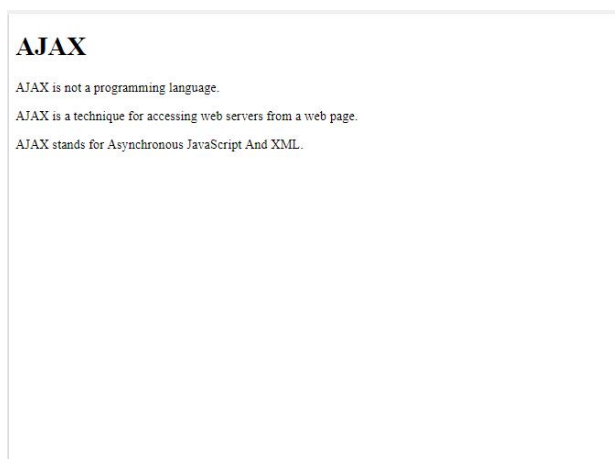

Tags Used:

<script>

Alert()

Implementation:

Output:

Code:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>

    <title>Ajax Example</title>

<script type="text/javascript">
function ajaxfunction() {
    var a = new XMLHttpRequest();
    a.onreadystatechange = function() {
        if (this.readyState == 4 && this.status == 200) {
            // alert(this.responseText);
            document.getElementById("test").innerHTML = this.responseText;
        }
    };
    a.open("POST", "introduction.txt", true);
    a.send();
}
</script>
</head>
<body>
<div id="test">
<button onclick="ajaxfunction()">Call Ajax</button>
</div>

</body>
</html>
```

Result: The experiment was successfully completed.
